DETAILED ACTION

Election/Restrictions

Claims 1-13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12/26/07.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14-20 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Alfano et al. (US 6,240,312). The Alfano et al. patent teaches a system for in-vivo imaging comprising: an in-vivo swallowable capsule device including at least: a CCD imager sensor; and a MEMS switch (col. 2, lines 42-58; col. 6, lines 21-46; col. 4, lines 25-37); and an external control device(see figure 1), the external control device including at least a magnetic field source producing a magnetic field sufficient to operate the switch (see figure 6), a controller to receive data relating to an in-vivo condition location and, in response, operate the magnetic field source (col. 2, lines 18-38; col. 3, line 64 - col. 4, line 19), and altering the operation of the switch alters the operation of the in-vivo device (col. 5, lines 25-65).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over Alfano et al. (US 6,240,312).

Regarding claim 21, Alfano et al. teaches all the limitations of the claimed subject matter except for mentioning specifically, wherein the switch comprises: a first ferromagnetic conductive terminal; a flexible ferromagnetic conductive terminal; and a non-magnetic conductive terminal; wherein the first ferromagnetic conductive terminal and the non-magnetic conductive terminal are electrically isolated.

The examiner takes official notice that manufactured MEMS switches are known to have a first ferromagnetic conductive terminal; a flexible ferromagnetic conductive terminal; and a non-magnetic conductive terminal; wherein the first ferromagnetic conductive terminal and the non-magnetic conductive terminal are electrically isolated, therefore, it would have been obvious to those skill in the art to utilize a MEMS switch with a ferromagnetic conductive terminal and the non-magnetic conductive terminal are electrically isolated, as is obvious and conventional in the art, based on what is known in the art.

Art Unit: 3737

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JOHN F. RAMIREZ whose telephone number is (571)272-8685. The examiner can normally be reached on (Mon-Fri) 7:00 - 3:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian L. Casler can be reached on (571) 272-4956. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
